EXPERIENCE

1. Technical Advice, Applied Research, and Teaching

Over the past thirty years I have provided technical and management advice on a wide range of resource development and environmental management issues. The majority of my work has been associated with resources development and management in developing countries, including project formulation, development, monitoring and evaluation; applied research; and training. This work has been undertaken for: the United Nations Agencies (World Bank, UNFAO, UNEP, UNDP, UNESCO), the World Conservation Union (IUCN), World Wide Fund for Nature (WWF), International Council for Exploration of the Seas (ICES), international aid agencies, and private consulting firms.
